

## PRESTIGE – Final workshop

Since 2010 a consortium consisting of 14 European institutions have come together to address the critically important issue of stent thrombosis. The project they are working on is known as PRESTIGE – which stands for “PREvention of late Stent Thrombosis by an Interdisciplinary Global European effort” – and is coordinated by the German Heart Centre in Munich. It is planned to run for four years from 2010 to 2014. The investigators secured funding from the European Commission. Within the project the scientists want to develop new concepts to identify and prevent stent thrombosis. With the impending completion of the project, we are pleased to present the results and to discuss future research needs. The first part of the event will be popular scientific.

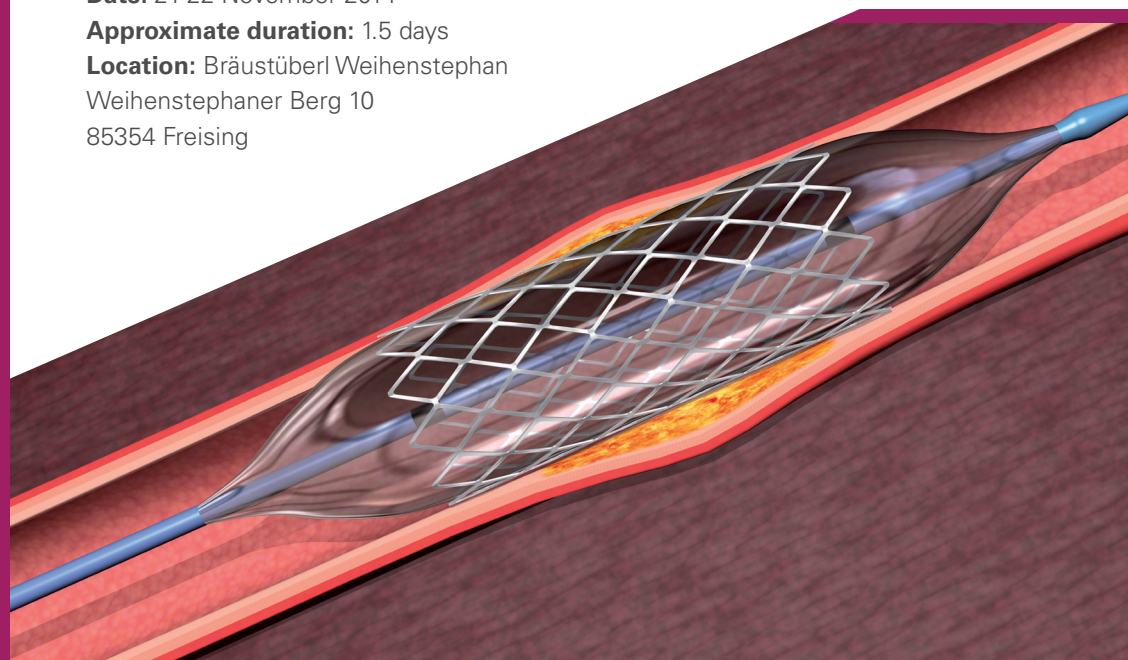

**Date:** 21-22 November 2014

**Approximate duration:** 1.5 days

**Location:** Bräustüberl Weihenstephan  
Weihenstephaner Berg 10
